

MOHOC

MOHOC® SPINE™ CABLE MANAGEMENT SYSTEM

Loose cables get in the way, create snag hazards, and come unplugged. They are not just annoying; they cost time, efficiency, and safety. SPINE™ encloses, organizes, and secures tactical cabling - keeping power and data connections flush, low profile, and mission ready.

SEGMENTED DESIGN

Modular stitched sections allow multiple entry/exit points and precise cable routing on helmets and body-worn platforms.

FIELD CONFIGURABLE

Cut between segments without loss of integrity. Use single sections or extend, curve, and overlap for complex cable pathways.

VERSATILE ACROSS TACTICAL ELECTRONICS

Designed for MOHOC® Cameras; adaptable to any cabled device on helmets, chest rigs, packs, vehicles, K9, and beyond. Works seamlessly with MOHOC® Shoulder Mount.

SNAG REDUCTION

Keeps cables aligned and flat against helmets, shoulders, torso, and dismounted gear.

BROAD CABLE COMPATIBILITY

Supports a wide-range of commercial and MIL-SPEC cables with elastic webbing over tactical nylon. Hook backing integrates with loop patches; adhesive loop included.

FLEXIBLE LOADOUT

Available as single units or 3-packs with purpose-built MOLLE pouch. Custom models available.

Patents and Trademark Pending

SPINE™ TECHNICAL SPECIFICATIONS (PATENTS AND TRADEMARK PENDING)

DIMENSIONS (L X W X H)	171 mm x 35 mm x 2.8mm (4.8mm with loop adhesive strip). Custom sizes available.
